PREFACE

This report is one in a series on Soviet Ground Force and logistic installations being prepared for a DIA CI/ Family. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center IPIe (PIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (I) unidentified facilities or tracking activity.

SUMMARY

25X1D

Priluki Ammunition Depot Ichnya SSW is located 23 kilometers (km) north-northwest of Priluki and 8.6 km south-southwest of Ichnya (Figure 1).

The installation covers approximately 730 acres and contains a total of 117 buildings, including 3 administration, 5 barracks, 61 storage, 46 general support and 2 probable ve-

hicle maintenance buildings (Figures 2 and 3).

The installation is covered by TALENT-KEYHOLE missions between [REDACTED]. Comparative analysis of photography indicates that the level of activity is constant throughout the year, and that no significant changes have been made in the installation during the period of photo coverage.

DESCRIPTION OF INSTALLATION

Railroad Service

A spur line from the main Priluki-Bakhmach rail line serves the installation. A spur to the storage area branches into 2 tracks just prior to entering the installation. Each track has a covered loading dock, one 155 feet long and one 125 feet long.

Road Service

An all-weather, probably graveled road connects the installation with the secondary road pattern in the vicinity and with the primary road between Priluki and Ichnya.

Administrative and Troop Housing Areas

Area D1 contains one administration, 2 barracks and 3 general support buildings. This area appears to be a support facility for the ammunition depot and is separated by fencing from Area D2.

Area D2 contains 2 administration, 3 barracks and 33 general support buildings. This area is also a support facility for the ammunition depot.

Ammunition Storage Area

Area F contains 61 storage and 10 support buildings.

Equipment Storage/Maintenance Areas

Area J1 contains a 220- by 30-foot maintenance building and a 310- by 160-foot parking area.

Area J2 contains a 120- by 30-foot maintenance building and a 430- by 180-foot parking area.

Athletic Field

Area K is possibly an athletic area.
